ESTIMATING & PURCHASING

What if you could manage estimating in a fast, efficient and accurate way, price and manage your model and option price books, respond to custom price requests or custom home building inquiries?

With Estimating and Purchasing by HomeFront Software you can do that and more.

This is the first product on the market that will allow model and options pricing, based on forecasted costs.

Estimating and Purchasing offers a complete 'sales to estimating to purchasing process solution.'

Approved contracts and change orders automatically update budgets and queues purchase orders for review to be sent to the related trades. Just like that!

HomeFront ~ Estimating and Purchasing offers several significant benefits including;

Shortened Implementation

- Use familiar tools such as Excel to build your price book and then simply import it into the solution
- Use pre-made Excel spreadsheets to build your price list and simply import your data

Real-time budget and quick production of purchase orders, based upon approved contracts and change orders from sales.

A diverse estimating system that includes:

- Area and phase specific sales and vendor pricing
- Standard substitutions for area specific items
- Auto retrieve measurements from on-screen take-off
- Ability to import data from Excel and other estimating packages
- Trade specific purchase orders, defaults and document attachment rules
- Initiate field and variance purchase orders on any handheld device, while out in the field
- Comprehensive Assembly Take-Off
- Function to copy proposals from other jobs
- Organise job related documents internally or share online with trades and customers
- Ability to re-assign work from one trade to another
- Update and track changes to models and options such as replacements, additions and substitutions

ACCOUNTING SOFTWARE INTEGRATION

HomeFront fully integrates with the most widely used accounting software available including;

- Sage 300 Construction and Real Estate
- Sage 100 Contractor
- Sage 50 Accounting
- QuickBooks

HomeFront Estimating & Purchasing has been developed as an integral part of HomeFront Software, which offers home builders a truly integrated, comprehensive software solution.

Streamline your estimating and purchasing with HomeFront
