PRODUCTION & SCHEDULING

HomeFront software brings it all together. Production & Scheduling provides critical value to every department of your business. It stands out amongst other similar software because it links directly to actual and budgeted costs and sales information for cash flow analysis.

You are able to create real-time schedules for construction, sales and administrative teams. This allows them to easily access and manage schedules on any handheld device via a standard web browser, no matter where they are.

Scheduling and Communication

- Create schedules using templates to determine the critical path of a project by specifying either the start or end date
- View and manage your schedules using an activity, Gantt, resource or calendar view
- Manage multiple trades per job
- View and update schedules for several jobs in the same Gantt view
- Keep your trades in the loop with automatic email notifications or via a secure web portal
- View resource allocations to ensure a balanced work load for trades

Online Interface

- Access and manage schedules on the web or any handheld device
- Initiate field and variance purchase orders while working in the field

Quality Assurance

- Enforce completion and standard checklists
- Link schedules to purchase orders and financial information for cash flow accuracy
- Approval of activities to be paid as well as designated automatic invoice approvals

ACCOUNTING SOFTWARE INTEGRATION

HomeFront fully integrates with the most widely used accounting software available including;

- Sage 300 Construction and Real Estate
- Sage 100 Contractor
- Sage 50 Accounting
- QuickBooks

HomeFront Production & Scheduling has been developed as an integral part of HomeFront Software, which offers home builders a truly integrated, comprehensive software solution.

Enhance your production and scheduling with HomeFront
